About Company

Hubert Subsea is a leading provider of advanced subsea engineering solutions. Founded in 2002, our company has grown to become a trusted partner for offshore operators and marine construction firms around the world. Our team comprises over a combined 20+ years of experience in the subsea industry. Additionally, collaborating with extensive network of over 800 skilled professionals. We pride ourselves on our technical expertise, innovative approach, and unwavering commitment to safety.

Who We Are

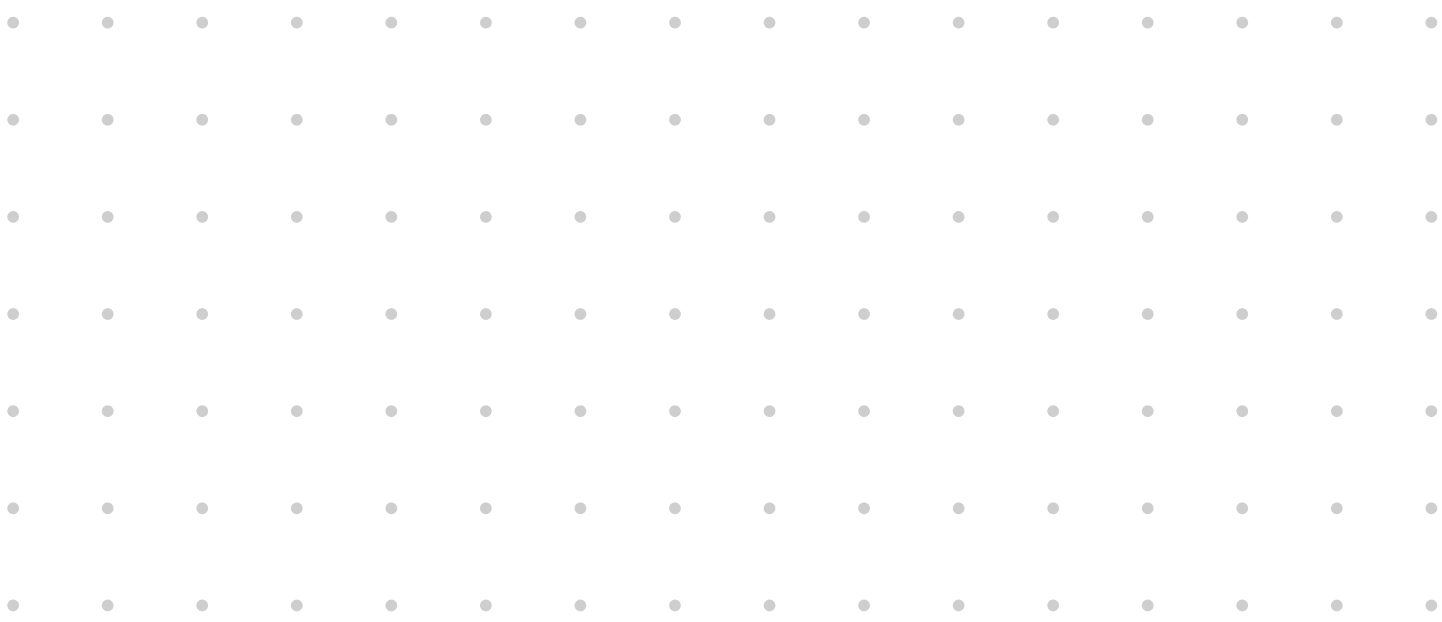

Our team comprises skilled professionals with extensive EPCI backgrounds in top dive companies, driven by a shared commitment to the marine and diving Industry.

Our Vision

"Diving into the Depths with Precision and Innovation". Our vision is to revolutionize underwater diving operations through cutting-edge technology, exceptional expertise, and a steadfast commitment to safety and sustainability.

Our Motto

"Beneath the Surface, Beyond Expectations," reflects our dedication to innovation, precision, and excellence in the subsea Industry.

Service Portfolio

Diving Services
(Onshore/Offshore)

Underwater construction using
Air/Saturation diving mode

I.M.R.(Inspection, Maintenance
& repair Services) for Offshore
structures

Salvage and Dam Work

Air and Saturation diving system
/WROV

Pre-commissioning of pipeline

Spares and Maintenance Services

Supply of Commercial Diving(Air &
Sat) Team within India/Outside
India

Offshore Structure Fabrication
Services

Skilled and Unskilled Manpower
Sourcing

Our IMCA-certified diving systems and 20+ years of combined expertise enable us to tackle complex underwater challenges up to 300 MSW. From air diving to advanced saturation systems, we deliver precision in every operation.

Offshore Construction Project

Risers & clamps installation

Riser clamps and retro-fit risers/
J tubes installation.

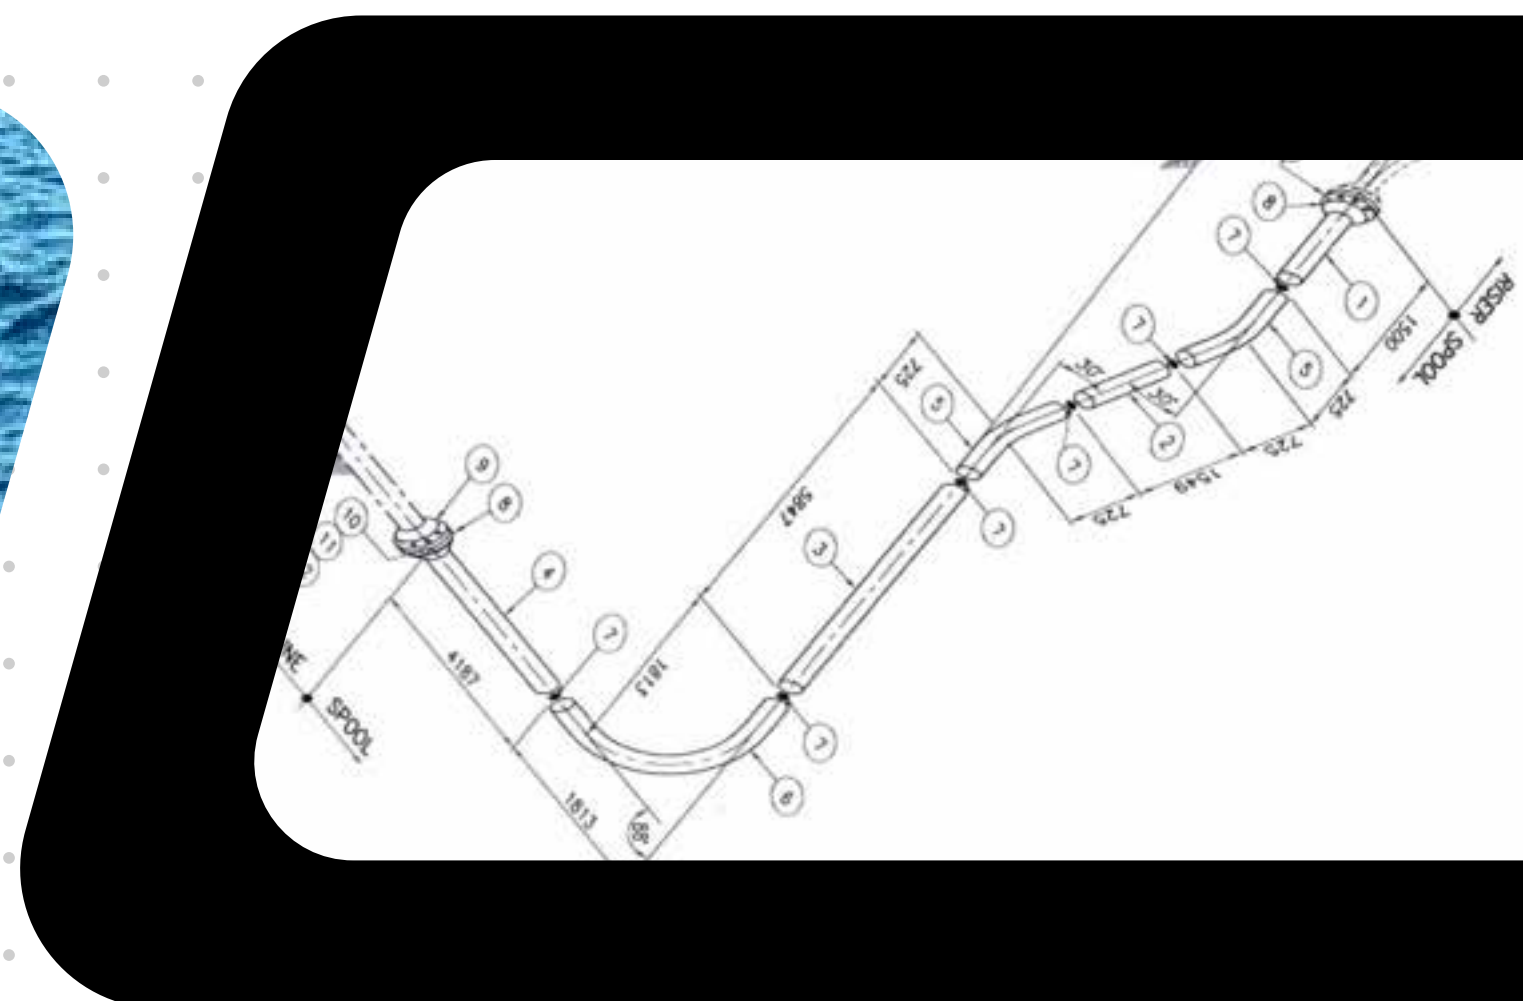

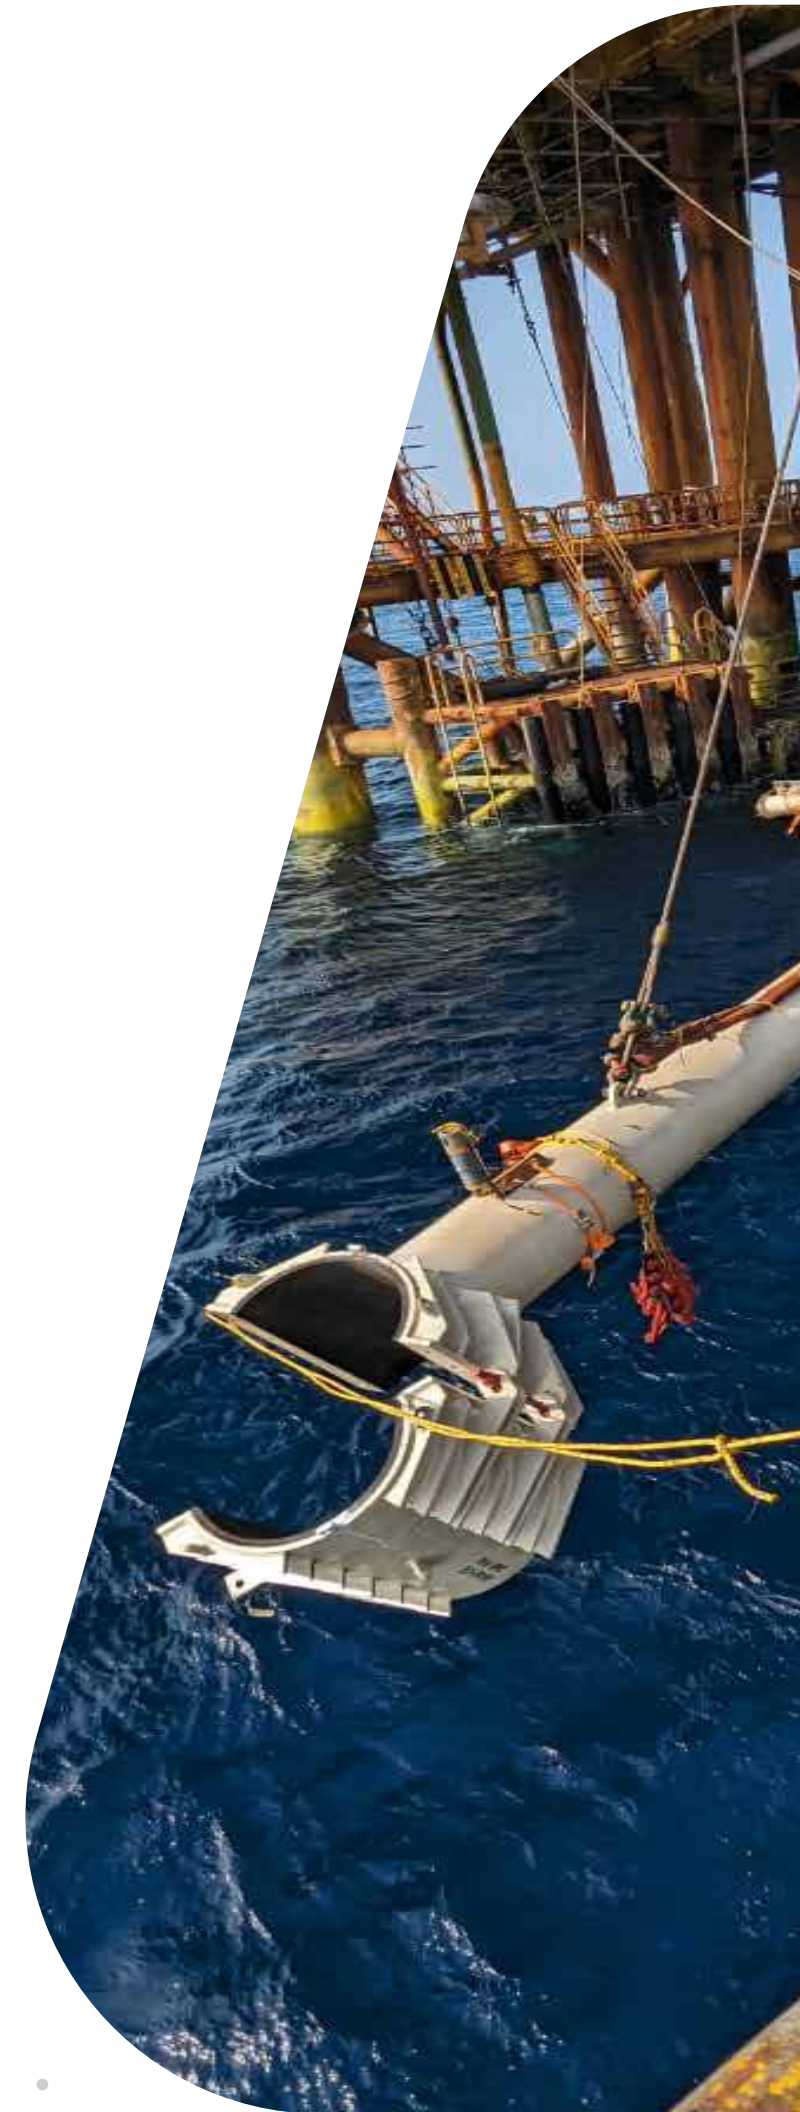

Spool tie-in

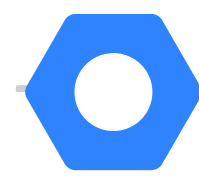

Spool Metrology, designing, Fa-
brication & Spool installation for
risers & pipeline tie-in.

Spru spool tie-in

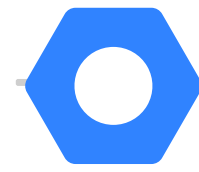

Spool Metrology, designing, Fa-
brication & SPRU Spool installa-
tion for new pipeline & old pipeli-
ne tie-in.

Hot tapping

Under water Survey & Hot tapping on live line.

Crossing correction

Survey & Crossing correction using ULO grout bags.

Free span correction

Survey & Free span correction using ULO grout bags/Pre-mix bags.

Jacket strengthening

Jacket survey and strengthening using grouting / nodal clamps.

Riser Guard Removal/Installation

Old riser guard removal and New guard installation.

Boat Landing Removal/Installation

Old boat landing removal and New boat landing installation.

Barge Bumper Installation

Old Barge bumper removal and New Barge bumper installation.

Bow String Installation

New bow installation for pipelay

Subsea Valve Skids Installation

Assembling of valves skids,
valves testing and installation.

Subsea PLEM/Lateral Installation

Subsea PLEM installation and
spool tie-in with various pipeli-
nes.

Lateral Tee installation.

Protection cages for PLEM/La-
teral Installation.

SBM/FPSO Decommissioning & Commissioning

We have expertise to provide
competent dive/construction
teams for Decom/Com of SBM /
FPSO.

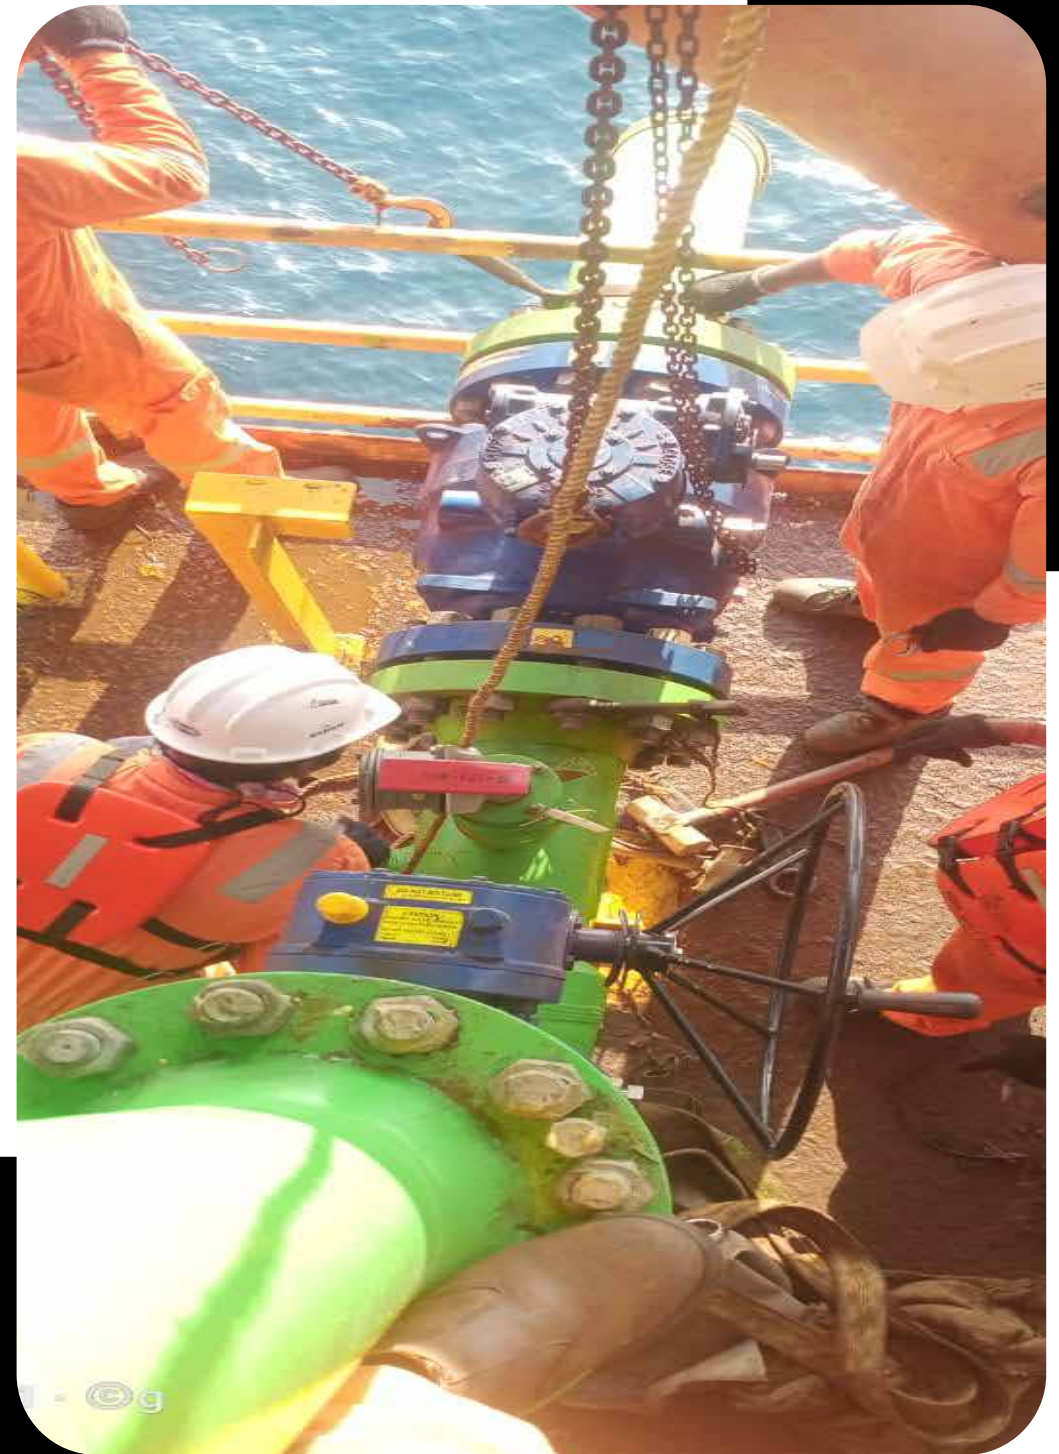

Subsea hose connections.

Export hose string connections.

Offshore Salvage Operation

We have expertise to provide
competent dive/construction
teams for Salvage operation
with Engineering back-up.

Offshore Cable Lay

Cable pulling through J tube.
Cable lay operation.

We have expertise to provide competent dive/construction teams for Cable operation with Engineering back-up.

Offshore Umbilical Lay & SSIV Commissioning

Umbilical pulling through J tube.
Umbilical lay operation & SSIV connection at SUTA for SSIV commissioning.

Air Dive Team/ System on Pipelay Barge

We have experience dive team and dive system for pipelay barge.

Bow string connection with A&R winch.

Stringer check.

Laydown head wire rope cutting.

Air Dive System

Air Dive System is an IMCA DO23 certified system capable of deploying 3 divers with umbilical length of 150m. System can be mobilized to any quayside or vessel when required.

Saturation Dive System

- The SAT is an IMCA DO24 certified system & a modular 12 man Saturation Diving System rated for 300 MSW. SAT SYSTEM is able to be configured for over the side.
- The system has a footprint of 13.1 m length x 13.9 m width (182m²) excluding gas quads.
- 3XDiver bell run capability.

Offshore Inspection Maintenance & Repair

Inspection of platform

- ⬢ We have expertise to provide competent inspection dive team for inspection work.
- ⬢ Visual Inspection -Video inspection (CCTV)
- ⬢ UT / CP & MPI Survey

Routine inspection & maintenance of SBM/FPSO/RIGS

- ⬢ We have expertise to provide competent inspection dive/construction teams for inspection & maint of SBM/FPSO/RIGS as per IRM manual.
- ⬢ Visual Inspection -Video inspection (CCTV)
- ⬢ UT / CP & MPI Survey

Skilled & Unskilled Manpower Sourcing

Unskilled manpower

- Hubert Subsea Pvt Ltd provides Manpower resources to the Oil Field sector for various Onshore & offshore projects.

Skilled manpower

- Hubert Subsea Pvt Ltd provides skilled and experienced Construction & Inspection crew to meet Project requirements efficiently.

Offshore Fabrication Services

Offshore spools fabrications

- Hubert Subsea Pvt Ltd provides Manpower resources to the Oil Field sector for various Onshore & offshore projects.

Offshore structure fabrications

- Hubert Subsea Pvt Ltd provides skilled and experienced Construction & Inspection crew to meet Project requirements efficiently.

Manpower supply for large infrastructure projects
